Ontario / Canada

ONTARIO, CANADA

Ontario is the largest of Canada's ten provinces in terms of population (8.4 million in 1977) and second largest in terms of area (413,000 square miles). With an estimated Gross Provincial Product of \$77.3 billion in 1976, Ontario enjoys one of the highest standards of living in the world.

The importance of Ontario to the Canadian economy can be seen in the fact that Ontario alone accounts for about 41% of Canada's Gross National Product and 39% of its total personal income.

Ontario is indeed the industrial heartland of Canada producing 50% of the nation's manufacturing shipments. And while it is responsible for 43% of total Canadian exports, it accounts for 83% of Canada's exports of fully manufactured products.
